

Your Quick Guide to Dynamics 365 Business Central for the
Manufacturing Industry

Microsoft Dynamics 365
Business Central

What is Microsoft Dynamics 365 Business Central?

Microsoft Dynamics 365 Business Central is a business management solution which allows you to streamline your internal processes and develop your business to its full potential.

Highly versatile and flexible, Business Central can be tailored to meet your unique business requirements. The revolutionary ERP solution is quick to implement, easy to use and offers scalable functionalities capable of supporting all processes across your business. Microsoft Dynamics supports hundreds of thousand companies worldwide with a range of solutions to fit every requirement.

How Microsoft Dynamics 365 Business Central can help you manufacturing business

Microsoft created Dynamics 365 with efficiency in mind. To support manufacturing businesses in tackling the countless challenges of a global business environment, Dynamics 365 breaks down the barriers between ERP and CRM systems and unifies them into one multifaceted solution.

The rich analytics and intelligence embedded in Dynamics 365 tools allows manufacturers to manage the ever-evolving demands of customers, suppliers and distributors more efficiently. By placing a cohesive end-to-end solution at your fingertips, Dynamics 365 provides manufacturers with the tools you need to manage all aspects of your manufacturing business from a unified platform.

With Microsoft Dynamics 365, you can uniformly improve processes across all areas of your organisation at a scale and pace best suited for your business. And since, in manufacturing terms, streamlined processes mean increased productivity and time saved, the Dynamics 365 solutions will positively impact your bottom line.

Key Benefits

Here are just some of the ways implementing Dynamics 365 ERP systems will transform your manufacturing business:

- Measure lead-time needed to manufacture parts
- Better production planning to meet the demands of clients and future orders.
- Improved overview of all aspects of production, from order taking through to delivery.
- Manage both repetitive and one-off manufacturing requirements.
- Report on costs, resources and orders to measure, maximising productivity & profitability.
- Faster, more productive business decisions.
- Fully integrated solution, bringing together information across all departments

Microsoft Dynamics 365 Business Central offers everything a business needs to effectively manage growth, boost efficiency and increase profitability.
