Your Quick Guide to Dynamics 365 Business Central for the
Construction Industry

Microsoft Dynamics 365
Business Central

What is Microsoft Dynamics 365 Business Central?

Microsoft Dynamics 365 Business Central is a business management solution which allows you to streamline your internal processes and develop your business to its full potential.

Highly versatile and flexible, Business Central can be tailored to meet your unique business requirements. The revolutionary ERP solution is quick to implement, easy to use and offers scalable functionalities capable of supporting all processes across your business. Microsoft Dynamics supports hundreds of thousand companies worldwide with a range of solutions to fit every requirement.

How Microsoft Dynamics 365 Business Central can help your construction business

Microsoft's Dynamics 365 ERP software system is tailored to assist construction business with a range of day-to-day tasks central to the success of the organisation. Dynamics 365 offers advanced procurement functionalities for construction businesses which provides a comprehensive overview of all the costs involved in each of your projects.

What's more, Dynamics 365 comes equipped with intelligent and centralised reporting capabilities which collect information from different sources and store it all in one place to facilitate easy monitoring of construction processes from start to finish. The software comes with the flexibility to create more detailed reports for further insight or build tailored, user-specific dashboards which restrict information to assigned employees.

Other industry-specific features tailored to the needs of construction companies include a detailed sub-contractor ledger featuring all your business' sub-contractor transactions, from timesheets and applications to invoices, and a plant hire functionality which allows you to raise a purchase order against specific jobs and dates when ordering additional plant hire.

Key Benefits

Here are just some of the ways Dynamics 365 will transform your construction business:

- Better control over projects, budgets and personnel.
- Real-time view of project status to manage costs and resources
- Ability to manage projects with remote access, whether on-site or off-site.
- Meets the demands of any construction business, such as VAT, contract sales, subcontractors and HR.
- Better collaborative working on projects and contracts, leading to more effective reporting and analysis of accounts.
- Faster, more productive business decisions.
- Fully integrated solution, bringing together information across all departments.

Microsoft Dynamics 365 Business Central offers everything a business needs to effectively manage growth, boost efficiency and increase profitability.
