

Your Quick Guide to NAV for the Manufacturing Industry

What is Microsoft Dynamics NAV?

Microsoft Dynamics NAV is a business management solution that allows you to fully automate and streamline your business processes.

NAV is versatile and flexible enough to be specifically tailored to your business requirements, providing scalable functionality to support all business processes, as well as being easy to use and quick to implement. Microsoft Dynamics NAV currently supports over 300,000 companies worldwide with over 2 million end users.

How NAV can support companies in the Manufacturing industry.

Microsoft Dynamics NAV offers a single, fully integrated solution for the manufacturing industry that's been tailored by Microsoft partners with specialist knowledge of the sector.

Microsoft Dynamics NAV and our partners' developments offer you complete control over every aspect of your production processes in order to manage costs more effectively and ensure you remain profitable. NAV allows you to increase response times to new orders and customer requests without compensating on product quality or customer service levels. The solution supports multiple manufacturing modes, including make to order, make to stock or a combination.

Whether you require full process manufacturing or just BOM (Bill of Materials), Microsoft Dynamics NAV provides you with the control, efficiency and visibility you need to be able to manage your business effectively and profitably.

Key Benefits

- Measure lead-time needed to manufacture parts
- Better production planning to meet the demands of clients and future orders.
- Improved overview of all aspects of production, from order taking through to delivery.
- Manage both repetitive and one-off manufacturing requirements.
- Report on costs, resources and orders to measure, maximising productivity & profitability.
- Faster, more productive business decisions.
- Fully integrated solution, bringing together information across all departments.

Microsoft Dynamics NAV 2015 offers everything a growing business needs to effectively manage growth and increase efficiency and profitability.
